

Invisible Fence® Customers -

Save on Upgrades & Replacement Batteries for All Dog Fence Brands

If you have an Invisible Fence® brand pet containment system, we can offer you a generous trade-in discount to upgrade your system to top of the line Pet Stop brand equipment. Offering many more firmware-based programming opportunities as well as GentleSteps™ Training capabilities and Comfort Contacts™, **Pet Stop underground dog fencing products are well known as the best in the industry.** Pet Stop products are also designed and manufactured right here in the USA, while Invisible Fence®, along with sister brands Petsafe® and Innotek®, are made by Radio Systems Corporation in China.

For Invisible Fence owners with 800 Series Dog Fences we offer the Eco-Lite 25 year rechargeable receiver for \$250.00. This is about \$100.00 cheaper than Invisible Fence Receivers. We also offer upgrade allowances for Petsafe® Underground Fences, Innotek Dog Fence®, Dog Guard® Pet Fencing, or Dogwatch® Hidden Fence pet containment systems.

For FREE Product Information, FREE Email Support Answers, and FREE Owner's Manual Downloads for your Invisible Fence® brand pet containment products, please email your request or call (404)536-6770.

Aftermarket Batteries So Good, They're Patented

If anyone knows how important the Power Cap® is to Invisible Fence owners it would be founder John Purtell, now President of Perimeter Technologies®. John and his team created the original Power Cap to ensure the optimal performance of your fence and to keep your treasured pet safe, first and foremost – however, that didn't mean that there wasn't room for improvement.

To help improve the battery John called on an expert, Scott Touchton, the previous Chief Engineer of Invisible Fence and the person who managed the team who invented the original Power Cap®. The goal was to eliminate mechanical failures that could jeopardize your pet's safety, so they focused on improving the contact design for better conductivity. The result was a power source that was designed to impress Invisible Fence owners, and to guarantee a battery that will last longer than the original design. Our patented Invisible Fence Power Cap alternative lasts from 6-12 months depending on your dog's interaction with his Invisible Dog Fence.

Perimeter Technologies is proud to offer an aftermarket battery that discriminating **Invisible Fence owners can have complete confidence is equal to or better than the original. Guaranteed.** Perimeter's patent on the battery improvements speaks for itself. And, it doesn't hurt that you save a little cash too.

Better than the R21™ receiver, but Half the Price.

In the early 1990s, Invisible Fence Company introduced the R21 receiver, a vast improvement over everything else available up to that point. Under Invisible Fence Chief Engineer Scott Touchton, it quickly became the best-selling pet fence receiver on the market, worldwide. That was more than 17 years ago.

Fast forward to 2008... technology has improved by leaps and bounds, and Invisible Fence now manufactures in China. After some “persistent persuasion” by a particular dealer, the Perimeter® team of Purtell and Touchton decided to offer advanced technology to Invisible Fence owners. The goal this time was to add some of the superior features Pet Stop owners enjoy, while again offering American made reliability. They wanted a receiver that was more rugged and waterproof, as well as safer and more comfortable for pets – like their Pet Stop receivers. The resulting Computer Receiver is a marvel of technology. It’s smaller, ½ oz. lighter, waterproof, has a progressive correction option, a low battery warning light, and more. This product beats the R21 hands down, in every respect.

Once again, Perimeter has produced a product that **Invisible Fence owners can have complete confidence is Better than the R21™**. For Invisible Fence owners with 800 Series Dog Fences we offer the Eco-Lite 25 year rechargeable receiver for \$250.00. This is about \$100.00 cheaper than Invisible Fence Receivers.
